**ONLINE EVENT - ORGANISED BY THE EU MISSION ADAPTATION WITH
THE COLLABORATION OF MISSION CITIES**

ADAPTATION SOLUTIONS IN BUILDINGS

THURSDAY 27 FEBRUARY, 12.00 - 13.30 CET

AGENDA

Welcome and opening remarks

Keynote presentation: Best practices for adapting buildings to climate change

Case study 1: Urban greening projects in buildings

Case study 2: Green roof strategies

Case study 3: Climate-resilient cooling adapted for cities and buildings

Q&A

Closing remarks

JOIN US

Buildings can be vulnerable to climate change, affecting both their structure and indoor conditions. This engaging online event, organised by the EU Mission Adaptation with the collaboration of Mission Cities, aims to offer practical insights for adapting buildings to the impacts of climate change. Participants will explore innovative solutions through real-world examples and best practices shared by experts, regions, and local authorities that have successfully implemented climate adaptation measures in buildings. Participants will gain actionable insights into the effective integration of climate adaptation measures in buildings, with a particular focus on practical applications, synergies between adaptation and mitigation, and overcoming common challenges. A dedicated Q&A session will provide a space to ask questions, exchange ideas, challenges and learnings.
